

November 04, 2025: at 5:03-5:04am. Factual Recording of Intrusive Spying and Degrading Insults by Sign Language

Today, as I work through the materials this early in the morning, I am experiencing a very loud train horn or large truck air horn (like a trumpet horn) sounding to cause a sound effect as I work through the definition of simlâh which means - for the feminine of H5566 (through the idea of a cover assuming the shape of the object underneath); a dress, especially a mantle, apparel, cloth, clothes, clothing, garment, raiment.

Apparently, the symbolic use of 'signs' and 'wonders' has been reduced to placing men in dresses by man on man rape - of both the person, their space, and their home.

For the record, this has become a common problem in both the USA and Russian military.

This is the culture of men that are 'watching' me inside of my home every day, every night, every moment - as perverted peeping toms. These are the men occupying the ranks of our United States National Security and Surveillance State - and these are the men that are raping our home on behalf of Donald Trump and Elon Musk.

The ongoing and continuously disruptive use of derogatory insults and threats against, and inside of my home, is nothing short of a war being waged against me and should qualify as a 'war' (certainly a psychological war)(and also a 'war' through their threats combined with actual ability to carry out harm) for the purpose of charging these men with treason.

I am requesting that treason charges be brought for the abuse that I have suffered under the intrusive space rape of Donald Trump, his team, and the technology that has been enabled by Elon Musk and Space-X.

Russian Use of Rape as a Weapon of War in Ukraine

BY: DR. GREGORY P. NOONE, SINDIJA BETA, AND ROPES & GRAY

Introduction

Numerous investigative reports into the Russian full-scale invasion of Ukraine since 2022 have documented extensive and shocking use of sexual and gender-based violence (“SGBV”) by Russian nationals against Ukrainian civilians, prisoners of war, and other detainees. Russia has long been responsible for a largely under-discussed and distressing amount of SGBV crimes, including rape. Russian SGBV atrocities have historically been especially brutal during World War II in Germany, as well as Afghanistan, Chechnya, and Georgia. Focus has recently turned to the question of how Russia could be held accountable for its use of SGBV as a weapon of war in Ukraine. Various sources of international law provide prohibitions on the use of SGBV during armed conflict, and there have been successful examples of holding individual perpetrators accountable under international criminal law in past conflicts.

As the Russian attacks on Ukraine continue unabated, it is appropriate to appraise the scale of SGBV committed, the international laws being breached, and the possible enforcement mechanisms.

Military Sexual Assault: A Framework for Congressional Oversight
